Wonderlic Distance Learning Solution

Overview

Wonderlic's Distance Learning Solution is a comprehensive set of student recruitment, screening and selection tools that offer innovative technology and time-tested content to assist school administrators in selecting students who possess the characteristics needed to succeed in online education programs. Our Distance Learning Solution helps you to understand risk factors, measure basic learning and problem solving ability, and evaluate the writing skills of potential distance learners. Whether used as a stand-alone solution or integrated into your existing student tracking system, this solution can be customized.

The Solution

Distance Learning programs rely heavily on their ability to identify students who can successfully complete programs and compete in today's job market. Our Distance Learning Solution utilizes the following:

The Wonderlic Behavioral Risk Profile

Wonderlic's exclusive, automated Behavioral Risk Profile can be incorporated with your existing applicant questions to identify risk factors that impact a potential distance learner's retention and completion rates. The Wonderlic Behavioral Risk Profile identifies student applicant attributes, both behavioral and attitudinal, along with skill level self-ratings to identify and mitigate risks, enabling your Admissions staff to focus their time on individuals who are most likely to succeed in an online program.

Scholastic Level Exam Quicktest (SLE-Q)

The Scholastic Level Exam Quicktest (SLE-Q) provides insight into an individual's ability to learn and be trained. Cognitive ability is the single best predictor of academic success. The SLE-Q can be administered remotely, via the Internet, 7 days a week. It takes only 8 minutes of a candidate's time and score reports are available within minutes.

Automated Essay Scoring

Leverage award-winning, web-based artificial intelligence to automate your collection and scoring process for distance learners, for both admissions essays and individual class writing assignments, with results in just seconds of submittal. The patented IntelliMetric® engine provides reliable and consistent results across grade levels, subject areas and context. You can have full confidence in each online writing skill assessment including scoring quality, consistency, reliability, and scalability.

Powerful Technology

Wonderlic Online is a secure, web based applicant tracking platform that enables school administrators to instantly manage their student application process at all levels. Student assessment results are all displayed together enabling easy evaluation and comparison so administrators can make informed admissions decisions quickly and efficiently. Wonderlic Data Exchange (WDE) additionally provides schools with the ability to pass student information (e.g., demographics, assessment results) between Wonderlic Online and your existing record keeping systems as part of a seamless experience.
