Description

The Sort Option in Wonderlic Online gives you three levels of sorting capabilities to identify your top candidates in a matter of minutes.

Let's walk through a simplified example. In this scenario the end user wants to focus on the highest scoring candidates of the Wonderlic Personnel Test. To do so, the end user chooses the following parameters:

See Illustration A for sorting.

- A** Sort By: WPT-R score
- B** Sort Type: Value
- C** Direction: Descending.

See Illustration B for scores sorted high to low.

Perhaps the end user wants to focus instead on candidates who best fit the cognitive ability requirements for the position. By changing "Value" to "Match" in the Sort By field, a different result is obtained:

See Illustration C for scores sorted strongest to cautionary.

Notice that the **green**, Strong fit scores are at the top of the list, followed by **yellow**, Moderate and **red**, Cautionary scores. Now the end user can quickly proceed with the next stage of the selection process.

If you have questions or need to review Wonderlic Online, call our training team at 800-323-3742.
