Quality Care Inventory - Nursing Assistant – Nursing Facility

The success of any health care practice is directly proportionate to the quality of its supporting allied health staff, which manages so many vital functions. Whether your practice is hiring to fill open allied health positions or exploring training and development opportunities for existing employees, ensuring that every member of your staff can perform their jobs at a high level is the key to realizing your practice’s productivity potential.

Wonderlic’s Quality Care Inventory (QCI) is a suite of interactive, assessments that measure job specific knowledge and skills, and overall job readiness for a variety of different allied health roles. Using the QCI to help identify and develop your team is a smart investment that will help you in your ongoing efforts to increase:

- Patient Satisfaction
- Revenue and Reimbursements
- The Legal Defensibility of Hire/No-Hire Decisions
- Profitability

PROFESSION OVERVIEW
Nursing Assistants in a Nursing Facility provide basic patient care under the direction of nursing staff. They perform duties such as feeding, bathing, dressing, grooming, moving patients and changing linens. They may transfer or transport patients. In a nursing facility they will also be serving a variety of short and long-term patients and family members. Includes nursing care attendants, nursing aides, and nursing attendants.
