Instructional Needs

Topics to Review (incorrectly answered questions at or below individual's current skill level)	
Language	Mathematics
Proofread and find error (homonym, preposition, possessive noun)	From a table, calculate difference in total cost, given rates, taxes, and fees
Proofread and find error (noun number, subject/verb agreement)	Multiply fractions with different denominators
Proofread and find error (adjective, preposition)	Word problem, percent discount
Proofread and find error (adjective, collective noun, commonly misused word, prepositional phrase)	Solve for an unknown, raised to an exponent, added to a known raised to an exponent, equaling a known value
Produce complete sentences, recognizing and correcting inappropriate fragments and run-ons	Word problem, calculate markup
Retrieve information from step-by-step instructions	Calculate the volume of a right rectangular prism

Topics to Learn (incorrectly answered questions above individual's current skill level)	
Language	Mathematics
Proofread and find error (gerund, noun number, possessive noun, subject/verb agreement)	Solve for the surface area of a right rectangular prism
Evaluate or infer the meaning of written prose	Order of operations without parentheses present
Identify a complete sentence	Limits problem, find the next point beyond the limit
Identify the meaning of a relatively sophisticated word without the aid of context clues	Solve for an unknown by combining and simplifying two algebraic equations
