

Wonderlic Advanced Skills Test - Non-Proctored

Where will he need training?

She has a degree, but can she really do the work?

Does he have the advanced math skills we need?

Description

Go beyond basic skills! Based on the Occupational Information Network (O*NET) and Common Core State Standards, the new **Wonderlic Advanced Skills Test** measures the language and mathematics skills needed to enter jobs that require “some” to “extensive” preparation. Non-proctored, online administration allows for fast, easy and accurate evaluation of your candidates 24/7 from anywhere in the world.

Fast and Easy for Everyone

Applicants can take the two 30-minute assessments 24/7 from any computer with online access, without the need for a proctor. The easy to read report compares the test taker's scores with the skill level required and provides an at-a-glance performance category (Below College-Ready, College-Ready or Bachelor's Degree-Equivalent). Detailed diagnostics help you understand exactly what training is needed, if any.

The Wonderlic Advanced Skills Test can be used by employers as a pre-employment test and a training assessment.

Pre-Employment Testing

Determining whether your applicants have the language and mathematics skills needed for your positions is critical. Don't find out after you've hired them that they can't do the job!

Training

Assessing current employees before they enter a training program is vital to their success and your bottom line. The diagnostics provided in the report pinpoint specific areas for improvement, so no time or money is wasted.

Scoring

Scoring recommendations are based on the requirements of the job and can be adjusted to meet the exact demands of the position.
